COMMISSION OF THE EUROPEAN COMMUNITIES

COM(78) 669 final.

Bruxelles, 23 november 1978

Communication from the Commission to the Council concerning the establishment for 1979 of the total allowable catch (TAC) for certain fish stocks existing within the Community fisheries zone.

COM(78) 669 final.

Communication from the Commission to the Council concerning the establishment for 1979 of the total allowable catch (TAC) for certain fish stocks existing within the Community fisheries zone.

The Commission is submitting for examination by the Council the annexed TAC figures which, on the basis of the considerations developed in point I 2 of the Communication (1) presented to the Council jointly with the present document, could be envisaged for some fish stocks occurring within the Community fisheries zone.

The Commission wishes to underline that as far as joint stocks are concerned, these figures may be subject to change in order to take account of the outcome of the consultations now being held within the context of reciprocal fisheries agreements negotiated by the Community with the non-member countries jointly responsible for the conservation of these stocks. These consultations, as well as additional scientific data, should allow TAC's to be calculated for the stocks for which no figure has yet been advanced.

(1) Communication to the Council concerning the development of the Common Fisheries Policy.

TACs by stock and by sector envisaged for 1979.
