1. INTRODUCTION

This Preliminary Draft Amending Budget No 3 to the Budget for 2009 (PDAB 3/2009) covers the implementation of the new Own Resources Decision No 2007/436/EC, Euratom (hereafter, ORD 2007)³, following the entry into force of ORD 2007 on 1 March 2009. PDAB 3/2009 takes into account the retroactive effect of ORD 2007 from 1 January 2007 onwards and therefore includes the adjustments for the financial years 2007, 2008 and 2009 related to the new provisions introduced by ORD 2007.

Therefore the Commission proposes to readjust the financing of the Community budget.

³ The implementation of ORD 2007 is regulated by Council Regulation (EC, Euratom) No 105/2009 of 26 January 2009 that amends Council Regulation (EC, Euratom) No 1150/2000.

2. RATE OF CALL OF THE VAT-BASED OWN RESOURCE

Council Decision No 2000/597 of 29 September 2000 (hereafter, ORD 2000) provided for the application of a uniform rate valid for all Member States to the harmonised Value Added Tax (VAT) assessment bases determined according to Community rules. This rate was calculated according to the specific provisions of Article 2 (4) of ORD 2000.

According to ORD 2007, the uniform rate of call of the VAT-based resource is fixed at 0.30 % from 1 January 2007. However, for the period 2007-2013, the rate of call of the VAT-based own resource for Austria has been fixed at 0.225 %, for Germany at 0.15 % and for the Netherlands and Sweden at 0.10 %.

The revised VAT-based own resource contributions taking into account the new uniform rates are set out in the following tables:

3. GROSS REDUCTIONS IN THEIR ANNUAL GNI-BASED CONTRIBUTIONS FOR THE NETHERLANDS AND SWEDEN

According to ORD 2007, the Netherlands and Sweden receive a gross reduction in their annual GNI-based contributions for the period 2007-2013. ORD 2007 specifies the amount of this reduction (which has to be adapted for current prices) and indicates that this reduction shall be granted after financing of the correction mechanism in favour of the UK (UK correction).

This reduction is to be financed by all Member States pursuant to Article 10 (9) of Regulation No 1150/2000, as amended by Regulation No 105/2009 implementing ORD 2007.

The gross reduction for the Netherlands and Sweden, which equals respectively EUR 605 million and EUR 150 million in 2004 prices, is adjusted to current prices by applying the GDP deflator for the EU expressed in Euro.

The following tables provide an overview of the gross reductions and their financing.

4. CALCULATION OF THE CORRECTION MECHANISM IN FAVOUR OF THE UNITED KINGDOM (UK CORRECTION)

ORD 2007 introduces several changes to the calculation of the amount of the UK correction.

The fixation of the rate of call of the VAT-based own resource at 0.30 % and the reduced rates temporary granted to Germany, the Netherlands, Austria and Sweden (see above) increase the amount of the UK correction via a reduction of the 'UK advantage', as described in Article 4 (1) (d) of ORD 2007 (unchanged, as compared to ORD 2000).

Article 4 (1) (f) of ORD 2007 suppresses the adjustment related to pre-accession expenditure from the 2013 UK correction (to be first budgeted in 2014) onwards.

Article 4 (1) (g) of ORD 2007 introduces an adjustment related to expenditure in the new Member States: from the 2008 UK correction (to be first budgeted in 2009) onwards, total allocated expenditure will be reduced by allocated expenditure in Member States which joined the EU after 30 April 2004, except for agricultural direct payments and market-related expenditure as well as that part of rural development expenditure originating from the EAGGF, Guarantee Section. This reduction will be phased in progressively according to the following schedule: 20 % for the 2008 UK correction, 70 % for the 2009 UK correction and 100 % onwards. The additional contribution of the UK resulting from the above reduction may not exceed a ceiling of EUR 10.5 billion, in 2004 prices, during the period 2007-2013. In the event of further enlargement between 2008 and 2013, this ceiling will be adjusted upwards accordingly.

The present PDAB 3/2009 concerns the 2007 UK correction and 2008 UK correction, the amounts of which are modified by ORD 2007. From the 2007 UK correction onwards, UK corrections are subject to the rules of ORD 2007 and its accompanying working document No 9851/07 ADD2 of 23 May 2007 on the calculation method of the UK correction⁴.

4.1. Calculation of the corrections

In the present PDAB, the calculation and financing of the *1st update* of the 2007 UK correction, as well as of the *provisional amount* of the 2008 UK correction are entered. The amount of the *1st update* of the 2007 and *provisional amount* of the 2008 UK correction are entered under chapter 15 of the PDAB 3/2009, respectively as a replacement of the *1st update* of the 2007 UK correction entered under chapter 15 of the AB 5/2008 and as a replacement of the *provisional amount* of the 2008 UK correction entered under chapter 15 of the budget 2009.

5. OTHER AMENDMENTS RELATED TO THE IMPLEMENTATION OF ORD 2007

5.1. Impact on GNI-based own resource contributions of the new call rate of the VAT-based own resource

By implementing the new rules regarding the call rate of the VAT-based own resource, VAT-based own resource contributions for the budgetary years 2007, 2008 and 2009 decreased by respectively EUR 4 382 748 876, EUR 3 269 127 949 and EUR 4 313 990 408.

To respect the principle of equilibrium applicable to the budget of the European Union, the uniform rate to be applied to the sum of all Member States' GNI has to be recalculated, taken into account the total of all other revenue, including VAT-based own resource contributions.

The recalculated uniform rate for the GNI-based own resource for each year is fixed at:

- 0.627343326 % for the year 2007 (instead of 0.590943535 %).

Uniform rate to be applied on 1 % of GNI = (total expenditure – other revenue – total net amount of traditional own resources – VAT-based own resource contributions) / 1 % of GNI

Uniform rate = $(113\ 845\ 815\ 415 - 7\ 642\ 610\ 077 - 16\ 532\ 900\ 000 - 14\ 134\ 480\ 075) / 120\ 405\ 880\ 000$

Uniform rate = 0.627343326 % (rounded)

- 0.609728123 % for the year 2008 (instead of 0.583692415 %).

Uniform rate to be applied on 1 % of GNI = (total expenditure – other revenue – total net amount of traditional own resources – VAT-based own resource contributions) / 1 % of GNI

Uniform rate = $(115\ 771\ 282\ 245 - 7\ 447\ 914\ 040 - 16\ 936\ 300\ 000 - 14\ 827\ 628\ 325) / 125\ 563\ 242\ 000$

Uniform rate = 0.609728123 % (rounded)

- 0.617882067 % for the year 2009 (instead of 0.584657588 %).

Uniform rate to be applied on 1 % of GNI = (total expenditure – other revenue – total net amount of traditional own resources – VAT-based own resource contributions) / 1 % of GNI

Uniform rate = $(116\ 096\ 062\ 329 - 1\ 359\ 722\ 489 - 19\ 206\ 100\ 000 - 15\ 302\ 126\ 900) / 129\ 843\ 731\ 000$

Uniform rate = 0.617882067 % (rounded)

The revised GNI-based own resources contributions considering the new uniform rates are set out in the following tables:

5.2. Technical amendments related to the implementation of ORD 2007

In addition, this PDAB incorporates some technical amendments related to the adoption of ORD 2007 and its implementing Regulation No 1150/2000, as last modified by Council Regulation No 105/2009. The adjustments proposed with this PDAB and the new provisions regarding the own resources must be reflected in the 2009 budget structure.

A first adjustment concerns the elimination of the distinction between agricultural duties (budgeted under Article 100 of the revenue side of the budget) and import duties (budgeted under Article 120 of the revenue side of the budget). Following the implementation in EU legislation of the agreements concluded during the Uruguay Round, there is no longer any material difference between agricultural duties and customs duties. Thus the distinction between these duties was removed in ORD 2007 and consequently, the budget nomenclature has to be adapted accordingly. Therefore Chapter 10 will no longer be used. All customs duties, including those relating to the agricultural sector, will be budgeted under Chapter 12.

A new Article 160 is created in Chapter 1 to accommodate the gross reduction in the annual GNI-based contribution granted to the Netherlands and Sweden (see point 3 above).

Finally, a new Chapter in the budgetary nomenclature has to be foreseen for the adjustments relating to the implementation of ORD 2007 for the years 2007 and 2008, as Article 11 of ORD 2007 stipulates that once the Decision enters into force, it shall take effect on 1 January 2007 (see points 3, 4 and 5.1 above). As budgetary years 2007 & 2008 are closed, these adjustments have to be done in the budgetary year 2009. Therefore, these adjustments will be integrated in title 3 (surpluses, balances, and adjustments) of the budget, where a new Chapter 37 is created.

6. SUMMARY OF THE FINANCIAL IMPACT FROM THE IMPLEMENTATION OF ORD 2007

The following summary table shows per year and per Member State the global impact of the implementation of ORD 2007. This global impact is the result of the sum of the amendments related to the new uniform rate of call of the VAT-based own resource, to the gross reduction in the annual GNI-based contributions for the Netherlands and Sweden, to the revised calculation of the UK correction and to the GNI-based own resource.
