COMMISSION OF THE EUROPEAN COMMUNITIES

COM(81) 315 final
Brussels, 19 June 1981

Proposal for a
COUNCIL REGULATION (EEC)

amending Regulation (EEC) No 1360/78 on producer groups and
associations thereof following the accession of Greece to the
European Communities

(presented by the Commission to the Council)

COM(81) 315 final

EXPLANATORY MEMORANDUM

The supply of agricultural products in Greece is characterised by very severe structural problems because of the existence in that country of a very large number of small and inefficiently organised producers. No more than 6 % of the value of Greek agricultural production is marketed in an organised fashion. Accordingly, profit margins accruing to the vast majority of farmers are capable of substantial improvement through better organisation of supply.

The application in Greece of Regulation (EEC) No 1360/78 on producer groups and associations thereof would be of significant benefit in remedying such structural deficiencies as exist in the supply area, and which, apart from certain exceptions apply to the whole of the country.

In accordance with Article 22 of the Act of Accession, therefore, it is necessary to amend Regulation (EEC) no 1360/78 in order to permit its effective application in Greece.

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 43 thereof,

Having regard to the Act of Accession of Greece, and in particular Article 22 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament¹⁾,

Whereas Article 3 of Council Regulation (EEC) No 1360/78 (2) fixes the agricultural products to which that Regulation applies, and it is necessary to define its area of application in Greece,

Whereas in Greece the supply of agricultural products is characterised by very severe structural problems; whereas in effect, this supply is placed on the market by a very large number of small and insufficiently organised farms; whereas, in particular, according to the information available, only some 16% of Greek farms are members of organisations which are concerned with the marketing of agricultural produce and only about 6 % of the value of agricultural production of the country is marketed by such organisations; whereas, apart from certain exceptions, these structural deficiencies of supply relate to Greek agriculture as a whole; whereas these exceptions, because of their limited nature, do not present the situation in Greece from being taken into consideration as a whole,
