## COMMISSION OF THE EUROPEAN COMMUNITIES

COM(80) 700 final.

Brussels, 12 November 1980

### Proposal for a COUNCIL REGULATION (EEC)

for a common measure to stimulate the improvement of public facilities in certain less favoured areas of the Federal Republic of Germany

(submitted to the Council by the Commission)

COM(80) 700 final.

#### EXPLANATORY MEMORANDUM

In certain less favoured areas in the Federal Republic of Germany within the meaning of Council Directive 75/268/EEC of 28 April 1975, on mountain and hill farming and farming in certain less favoured areas (1) public facilities and water engineering are particularly deficient.

The elimination or at least the reduction of these deficiencies, particularly those relating to farm roads and water engineering in agriculture, forms an important prerequisite for the structural improvement and the efficacy of the reform of agriculture in those regions.

As a result, the creation and the improvement of agricultural roads and the undertaking of measures in the field of water engineering, particularly those concerning the flood control and soil protection are necessary.

A financial contribution by the Community for such projects, within the framework of a common measure, can contribute to a significant reduction in the adverse effects of these infrastructural deficiencies.

Proposal for a Council Regulation for a common measure to stimulate the improvement of public facilities in certain less favoured areas of the Federal Republic of Germany

-1-

THE COUNCIL OF THE EUROPEAN COMMUNITIES.

Having regard to the Treaty establishing the European Economic Community, and in particular Article 43 thereof,

Having regard to the proposal from the Commission,

Having regard to the opinion of the European Parliament,

Whereas by virtue of Article 39 (2) (a) of the Treaty, the social structure of agriculture and the structural and natural disparities between agricultural regions must be taken into account in determining the common agricultural policy,

Whereas in order to attain the objectives of the common agricultural policy set out in Article 39 (1) (a) and (b) of the Treaty, special measures must be taken, at Community level, to remedy the situation in those agricultural areas where production conditions are particularly difficult,

Whereas certain less favoured areas of the Federal Republic of Germany within the meaning of Council Directive 75/268/EEC of 28 April 1975 on mountain and hill farming and farming in certain less favoured areas (1) are characterised by deficiencies in the public amenities, including water engineering in agriculture,

Whereas structural changes and agricultural reforms in these regions cannot be effective unless these amenities are improved,

(1) O.J. No L 128, 19.5.1975, p. 1

Whereas it seems opportune that the provision of a proper rural road network, as well as the improvement of water engineering should be encouraged by means of Community aid.

2.

Whereas the projects must also, in order to qualify for Community financing, contribute in particular to a lasting improvement in the public amenities available to agricultural holdings, have adequate economic justification and be coordinated with other measures for encouraging agriculture and for improving amenities; whereas they must also form part of/outline programme coordinating the various programmes and measures for the balanced development of agriculture and public amenities in the areas concerned,

Whereas to ensure coordination of action by the Community and by the Member State, the projects to be financed by the European Agricultural Guidance and Guarantee Fund, hereinafter referred to as the Fund, should be approved and part-financed by the Member State concerned,

Wheras to secure observance by the recipients of the conditions on which aid is granted from the Fund, an effective control system should be set up and provision made for suspension, reduction or termination of aid from the Fund,

Whereas in view of the special difficulties affecting these regions, the Community should provide aid from the Fund in the form of a capital subsidy not exceeding 30 % of the total investment,

Whereas the measures referred to above accordingly constitute a common measure within the meaning of Article 6 of Council Regulation (EEC) No 729/70 of 21 April 1970 on the financing of the common agricultural policy (1) as last amended by Regulation (EEC) No 2788/72 (2),

(1) O.J. No L 94, 28.4.1970, p. 13 (2) O.J. No L 295, 30.12.1972, p. 1 Whereas aid from the Fund provisionally estimated at 45 million Buropean units of account over five years will contribute to improving public amenities in these regions,

Whereas a procedure for approval of the projects should be established which ensures close cooperation between the Member States and the Commission within the Standing Committee on Agricultural Structure, set up under Article 1 of the Council Decision of 4 December 1962 on the coordination of policies on the structure of agriculture (1); whereas consultation of the Fund Committee referred to in Article 11 of Regulation (EEC) No 729/70 should also be provided for,

The surface area concerned by the measures represents 9 % of the surface area of the German Federal Republic.

On average, over a 5 year period, national aid for these sectors amounts to 1,315 MEUA.

Hence the aid for the zones concerned can be evaluated at about 120 MEUA.

However, the costs of carrying out this type of work, in these difficult regions can be 50 % greater than the average costs.

As a result, the national aid will be equivalent to 180 MEUA.

The objective being to accelerate the execution of these works by about 25 %, the Community financial contribution should correspond to 25 % of 180 MEUA, that is 45 MEUA.

The timetable of this aid could be as follows :

Year	1	2	3	4	5	6	7	8	Total
Commitments	9	9	9	9	9	-	-	-	45
Payments	p.m.	3	6	9	9	9	6	3	45
