COMMISSION OF THE EUROPEAN COMMUNITIES

COM(78) 604 final

Brussels, 17 November 1978

Draft

COUNCIL REGULATION (EEC)

on the tariff treatment of certain products intended for
use in the construction, maintenance and repair of air-
craft

(submitted to the Council by the Commission)

COM(78) 604 final

EXPLANATORY MEMORANDUM

Regulation (EEC) No 2609/77 of the Council, of 21 November 1977, on the tariff treatment of certain products intended for use in the construction, maintenance and repair of aircraft (1), provided for the total or partial suspension as the case may be, of the duties laid down in the Common Customs Tariff for a certain number of products intended :

- either to be incorporated in the construction of aeroplanes of an unladen weight exceeding 15 000 kg,
- or intended to be used for the purposes of maintenance or repair of aeroplanes of an unladen weight exceeding 15 000 kg, or of aeroplanes or helicopters of an unladen weight exceeding 2 000 kg but not exceeding 15 000 kg.

These suspension measures expire on 31 December 1978, and it becomes necessary to define, taking into account the technical capabilities of the Community industries, the tariff treatment to be applied with effect from that date, to products imported from third countries both for the purposes of the construction of aircraft as well as their maintenance and repair.

This then is the purpose of this draft Regulation which may be summarised as follows :

The treatment laid down in Regulation (EEC) No 2609/77 applicable to the construction, maintenance or repair of certain aeroplanes or helicopters shall be continued.

However, the lists of products currently eligible for duty-free admission, whether included in Annex I (construction of aeroplanes of an unladen weight exceeding 15 000 kg) in Annex II (maintenance and repair of aeroplanes of an unladen weight exceeding 15 000 kg),

.../...

(1) OJ No L 305, 29 November 1977, p. 5.

or in Annex III (maintenance and repair of aeroplanes and helicopters of an unladen weight exceeding 2 000 kg, but not exceeding 15 000 kg), have been slightly modified to provide for the addition of one or more products and types of aircraft as the case may be.

In addition, to take account of progress made by the Community's aircraft equipment industry, the suspensions provided for with regard to certain products have been abolished so as to safeguard to the maximum the interest of the Community producers.

With the rapid development of the Community aircraft industry, it is necessary to make provision for the constant adaptation of the various tariff measures in force in this respect, at the same time bearing in mind the technical capabilities of that industry.

To this end, this draft Regulation limits the application of the measures for admission duty-free or at reduced rates of duty which it prescribed, to a relatively short period (one year).

DRAFT
COUNCIL REGULATION (EEC)

on the tariff treatment of certain products intended for use in the construction, maintenance
and repair of aircraft

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 28 thereof,

Having regard to the draft Regulation submitted by the Commission,

Whereas Council Regulation (EEC) No 2609/77 of 21 November 1977 on the tariff treatment of certain products intended for use in the construction, maintenance and repair of aircraft⁽¹⁾, provides for the total or partial suspension, as the case may be, of the duties laid down in the Common Customs Tariff for a certain number of products which are intended to be either incorporated in the construction of aeroplanes of an unladen weight exceeding 15 000 kg or used for the maintenance or repair of aeroplanes of an unladen weight exceeding 15 000 kg or for aeroplanes or helicopters of an unladen weight exceeding 2 000 kg but not exceeding 15 000 kg;

Whereas all these suspension measures will expire on 31 December 1978;

Whereas, having regard to the technical requirements associated with the design of aeroplanes currently constructed in the Community, suspension measures differentiated according to the type to which the aeroplanes under consideration belong should be maintained from 1 January 1979 in respect of products intended for the construction of aeroplanes of an unladen weight exceeding 15 000 kg in order to take account, in each case, of the capabilities of the Community industry;

Whereas, in view of the principles laid down for suspension of Common Customs Tariff duties in respect of certain products intended for the construction of aeroplanes of an unladen weight exceeding 15 000 kg, it is necessary to establish a list of products admissible to

suspension of customs duties for the maintenance or repair of aeroplanes of that kind constructed in the Community; whereas, provided that account is taken of the current capacity of the Community industry, the arrangements should also be continued whereby users of aircraft of an unladen weight exceeding 15 000 kg constructed in third countries or the previous construction of which in the Community has required a considerable quantity of products imported from third countries, may obtain supplies of products necessary for the maintenance or repair of such aircraft under suspension of Common Customs Tariff duties;

Whereas a limited number of products which are not available in the Community are also essential for the maintenance or repair of certain types of aeroplanes and helicopters of an unladen weight exceeding 2 000 kg, but not exceeding 15 000 kg; whereas Common Customs Tariff duties in respect of these products should accordingly be suspended;

Whereas provision should be made for the adaptation, in the light of advances in the technical capabilities of the Community aircraft industry and of Community aircraft equipment industries, of the arrangements to be made concerning the application of the Common Customs Tariff to products imported from third countries for use in the construction, maintenance or repair of aircraft; whereas such adaptation could involve a review of arrangements in force at relatively short intervals; whereas it is therefore necessary to limit the period of application of this Regulation to one year,

HAS ADOPTED THIS REGULATION:

Article 1

1. The Common Customs Tariff duties on the products listed in Annex I shall be suspended to the levels indicated in column 3 thereof provided that the said products are intended to be incorporated, on the conditions to be determined by the competent authorities, in the construction of aeroplanes of an unladen weight exceeding 15 000 kg, as individually listed in column 4 of the said Annex.

(¹) OJ No L 305, 29.11.1977, p. 5.

2. This Article shall also apply to the same products intended for the manufacture, on the conditions to be determined by the competent authorities, of parts necessary for the construction of the aircraft concerned.

Article 2

1. The Common Customs Tariff duties on the products listed in Annex II shall be suspended to the level indicated in column 3 or 4 thereof, as the case may be, provided that such products are intended to be incorporated, on the conditions to be determined by the competent authorities, in the maintenance or repair of aeroplanes of an unladen weight exceeding 15 000 kg comprised in one or other of the categories specified in that Annex and, in respect of those in category B, in so far as the maintenance or repair relates to aeroplanes listed in column 5 of that Annex.

2. However, in the case of products falling within heading Nos 85.15, 85.22, 90.14, 90.28 and 90.29 of the Common Customs Tariff and indicated by a ⁽¹⁾, paragraph 1 shall apply only where such products are intended for the maintenance or repair of aeroplanes of a type certificated for the first time in a Member State of the Community before 1 January 1973 and either constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.

Article 3

1. The Common Customs Tariff duties on the products listed in Annex III shall, provided that such prod-

ucts are intended to be incorporated, on the conditions to be determined by the competent authorities, in the maintenance or repair of aeroplanes and helicopters of an unladen weight exceeding 2 000 kg but not exceeding 15 000 kg, which are listed in column 4 or column 5 of that Annex, as the case may be, be suspended to the levels indicated in column 3.

2. However, in the case of products falling within heading Nos 85.15, 90.28 and 90.29 of the Common Customs Tariff and indicated by a ⁽¹⁾, paragraph 1 shall apply only where such products are intended for the maintenance or repair of aeroplanes and helicopters of a type certificated for the first time in a Member State of the Community before 1 January 1973 and either constructed in the Community or imported and used at that date on regular routes by airline companies of the Community.

Article 4

For the purposes of Articles 2 (2) and 3 (2), 'type of aeroplane or helicopter' shall be taken to mean the prototype of that aeroplane or helicopter and versions derived directly from that prototype, except versions which differ fundamentally from the prototype.

Article 5

This Regulation shall enter into force on 1 January 1979.

It shall apply until 31 December 1979.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Council
The President

ANNEX I

List of products in respect of which Common Customs Tariff duties are totally or partially suspended where such products are intended to be incorporated in the construction of aircraft of an unladen weight exceeding 15 000 kilograms

CCT heading No	Description of goods	Rate of duty	Aeroplanes concerned
1	2	3	4
38.19	<p>Chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included; residual products of the chemical or allied industries, not elsewhere specified or included:</p> <p>ex P. Preparations known as 'liquids for hydraulic transmission' (for example, hydraulic brake fluids) not containing or containing less than 70% by weight of petroleum oils or oils obtained from bituminous minerals:</p> <p>— Based on silicate or phosphoric esters</p>	0 %	All aeroplanes
39.02	<p>Polymerization and copolymerization products (for example, polyethylene, polytetrahaloethylenes, polyisobutylene, polystyrene, polyvinyl chloride, polyvinyl acetate, polyvinyl chloroacetate and other polyvinyl derivatives, polyacrylic and polymethacrylic derivatives, coumarone-indene resins):</p> <p>C. Other:</p> <p>VI. Polystyrene and copolymers of styrene:</p> <p>ex b) In other forms:</p> <p>— Acrylonitrilebutadiene styrene, in sheets specially designed for lining the internal walls of aeroplanes</p> <p>VII. Polyvinyl chloride:</p> <p>ex a) In one of the forms mentioned in Note 3 (a) and (b) to this Chapter:</p> <p>— Approved for aircraft construction, and in the form of granules</p> <p>ex b) In other forms:</p> <p>— In sheets specially designed for lining the internal walls of aeroplanes</p> <p>ex VIII. Polyvinylidene chloride; copolymers of vinylidene chloride with vinyl chloride:</p> <p>— In sheets specially designed for lining the internal walls of aeroplanes</p>	0 %	Airbus, F 28

ANNEX II

Tariff treatment applicable to certain products intended to be incorporated as a result of maintenance and repair in aeroplanes of an unladen weight exceeding 15 000 kilograms

Note for the purpose of the following table:

(a) category A comprises aeroplanes of an unladen weight exceeding 15 000 kilograms other than those specified under (b) below;

(b) category B comprises aeroplanes of the following types: BAC 111, Siddeley Trident, Airbus, Concorde, Mercure and F 28.
