EXPLANATORY MEMORANDUM

1. Regulation (EEC) No 1728/74 on the coordination of agricultural research provides in Article 5 for specific measures of coordination which may take the form of joint projects or coordination of activities, to apply to given research topics or areas.
2. The Council Decision of 30 October 1978 (78/902/EEC) adopted joint programmes and programmes for coordination including the following measures:
  - (i) Land-use and rural development,
  - (ii) Mediterranean agriculture,
  - (iii) Agricultural waste and effluents from intensive stock-rearing,
  - (iv) Animal pathology,
  - (v) Improving the production of European beef herds,
  - (vi) Biological and integrated pest control,
  - (vii) Methods of improving plant resistance to disease and environmental pressures,
  - (viii) Agri-food research,
  - (ix) Elm disease: this is a pilot scheme for coordinating research into tree diseases,
  - (x) Improvements in the production of plant proteins.
3. These ten specific programmes are in line with the following four objectives of the Common Agricultural Policy:
  - (a) Socio-structural objectives, (1, 2, 3)
  - (b) Removal of obstacles to intra-Community agricultural markets (4)
  - (c) Efficiency of production (5, 6, 7, 8, 9)
  - (d) Alternative products (in particular, improvement of fodder production). (10)
4. Some of the objectives and their application within these 10 research programmes imply that Greece, following its accession to the European Communities, should be involved until 1983 in the current scientific work, particularly in respect of the Mediterranean agriculture programmes.
5. Annex I provides detailed financial estimates per year and per measure.

6. It is proposed that the Council adopt the attached Decision to bring about an increase in the Community financial contribution to carrying out the programmes, following Greek accession.
